HIGH-DUTY SINGLE ACTING SOLENOIDS

Measurement table model 300

Electromagnets of linear activation and simple effect. The movable core slides on long-lasting self-lubricated holders not requiring maintenance.

The assembling position does not alter the good functioning of the device which can be perfectly used in horizontal position.

MAGNETIC FORCE VALUES FOR 110, 180 AND 220 V.

The values indicated in the tables correspond to the force in Kg for every moment of its stroke.

The useful power is obtained by deducting the movable core weight from the value indicated in the tables when working vertically. The weight is to be added in the case of the inverse position.

(Measures expressed in mm)

* 362 until 18 mm stroke with the same force that 15 mm stroke

* 372 until 20 mm stroke with the same force that 15 mm stroke

* 390 until 22 mm stroke with the same force that 20 mm stroke
